TARGETS FOR ENDING THE AIDS EPIDEMIC BY 2030

We aim to bring the HIV epidemic under control so that it no longer represents a public health threat to any population or country.

90% reduction in new HIV infections
90% reduction in stigma and discrimination
90% reduction in AIDS-related deaths

Source: UNAIDS
The importance of location and population

Source: UNAIDS

People living with HIV (children and adults) are included as members of all of the featured populations. They are implicitly included in this map as they must have universal access to services.
