HIV PREVENTION
HIV TESTING
“There can be no keener revelation of a society’s soul than the way it treats its children.”

Nelson Mandela
The Global Picture – What do we know?

• Critical entry to life-saving care.

• Low level of testing, late testing leading to late entry to care and unnecessary loss of life.

• Who is left behind?
  – Children and Adolescents
  – Males
  – Key Populations
AIDS-related deaths among adolescents (10–19 years) increased by 50% between 2005 and 2012. In contrast, deaths across all age groups fell by 30%.
What next?

• Scaling up adolescent friendly services and improving access for adolescent key populations.

• **Highlight from Guidelines**
  – Addressing **policy and legal barriers**
  – Strengthen **provider initiated testing and counseling** for adolescents and access to testing for **adolescent key populations**
  – **Integration** and **decentralization**
  – **Innovation** to expand testing
  – **Data**
  – **Community engagement** and partnership with **adolescents and young people living with HIV**
  – **Linkage to prevention and treatment services**
Innovations in Demand Creation

Faça aqui o teste de aids, sifilis e hepatites B e C. É rápido, seguro e um direito seu.
FROM HERE TO POST-2015
ACT 2015: One goal, many voices

is a movement building initiative that aims to secure a post-2015 development framework that advances the sexual and reproductive health rights and the HIV response for young people. This is phase 1 of a 3 phase initiative.
